

# CITY OF MILWAUKIE

## Milwaukie Bay Park Bank Repair

The City of Milwaukie is working with a design team to:

- Develop construction plans for stabilizing the bank
- Improve riparian habitat
- Provide a durable access route
- Enable park visitors to visit the low-water beach area safely

**Use of Milwaukie Bay Park will be impacted through the end of November.**

During construction, portions of the concrete path along the riverfront will be closed to the public. The low-water beach will be closed to public access for about 8 weeks while heavy equipment works in the area.

## Kellogg Creek Bridge

In December 2015, record rainfall caused significant scouring and a bank failure near the footings of Kellogg Creek bridge. The City has elected to replace the bridge with help from a FEMA grant.

The new Kellogg Bridge is now open! The old bridge will be demolished in the upcoming weeks.

The new bridge features:

- ❖ Wider lanes
- ❖ Seismic preparedness
- ❖ A kayak rack
- ❖ Greater safety for pedestrians
- ❖ A sidewalk connecting south & north Milwaukie Bay Park
