

Sheridan School District Long-Range Facility Plan

Planning for our schools' futures

FALL 2018

Sheridan School District has begun a planning process that will provide a 20-year vision and guidance for improvements or changes related to buildings, grounds and all District properties, as well as associated equipment such as technology or sports infrastructure.

This plan will provide direction for future decisions such as renovation, construction, or other projects, and outline estimated costs and funding approaches.

Our plan will be based on the question:

What steps can the District take to help our students thrive during and after their school career?

Join the conversation about our schools!

Do you have thoughts on how we could improve our schools? Would you like to shape how we invest in our schools moving forward? Your voice matters!

The more people involved with the plan, the better it will reflect our community's needs and vision. There are many ways to get involved:

Join the Planning Advisory Committee:

You'll be an important partner in considering needs and goals – and prioritizing how best to achieve them. Please join before November 15.

Provide input on upcoming surveys:

Why are we doing a Long-Range Facilities Plan?

The design of teaching and learning spaces must be carefully planned to support educational objectives, as well as to provide safe, clean and technologically up-to-date facilities. A plan reduces costs over the long-term by carefully planning for future needs and avoiding emergency projects.

What's the plan based on?

- » Professional facility assessments
- » Student enrollment projections
- » Instructional philosophy and goals
- » Community values / priorities

Who benefits from the plan?

- » Educators
- » Collaborative partnerships
- » Taxpayers
- » Students
- » Staff
- » EVERYONE in the community

A Long-Range Facilities Plan can...

Provide solid base for planning and meeting changing needs

Support budget planning by leveraging shrinking dollars

Correlate facilities planning with instructional planning

Help District continue to achieve goals during challenging times

What will be happening this year?
